

Paper roll clamp 360°

long arm split

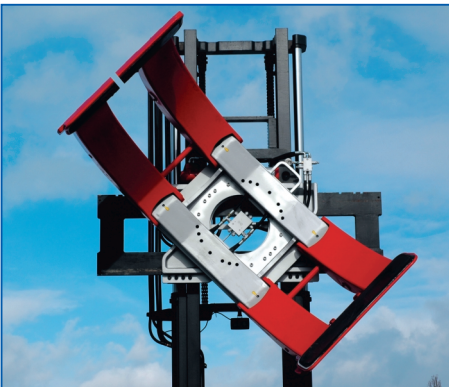

PRK-T

The **paper roll clamp PRK-T** is able to take rolls vertically or horizontally and rotates 360°. Due to a split long arm the clamp allows handling of two reels with different diameter. The short arm can be chosen fixed (PRK-TS) or variable positioned (PRK-TB) with an extra cylinder. The rotation is provided by the Durwen direct drive rotator.

type	lift truck capacity tons	ISO	capacity kg	short arm	roll diameter E-D mm	contact pads c x l mm	Z mm	V LLC mm	ESP COG mm	weight kg

- 2 hydraulic functions required
- includes hoses and couplings
- safety break as standard
- 10 mm rubber coated pads upon request
- 20 mm rubber coated pads upon request
- standard pad surface structured steel
- other pad surfaces upon request
